Contents

Editorial vii

Regular papers

Technological aspects of high-Tc superconductors 1
A.G. Mamalis

Grooving by Nd:YAG laser treatment 32
G. Lallemand, G. Jacrot, E. Cicala and D.F. Grevey

Developing a flexible sheet forming system 38
C. Hindman and K.B. Ousterhout

An empirical study on the generation of an edge radius in abrasive jet external deburring (AJED) 49
R. Balasubramaniam, J. Krishnan and N. Ramakrishnan

Effect of ironing on the residual stresses in deep drawn cups 54
M.S. Ragab and H.Z. Orban

Joining techniques for aluminium spaceframes used in automobiles. Part I — solid and liquid phase welding 62
T.A. Barnes and I.R. Pashby

Joining techniques for aluminium spaceframes used in automobiles. Part II — adhesive bonding and mechanical fasteners. . . . 72
T.A. Barnes and I.R. Pashby

Applications of superplastic forming and diffusion bonding to hollow engine blades 80
Y.W. Xun and M.J. Tan

Friction in cold rolling of a low carbon steel with lubricants 86
C. McConnell and J.G. Lenard

Application of a continuous ink jet printer to solid freeforming of ceramics 94
P.F. Blazdell and J.R.G. Evans

A new analytical model for pressbrake forming using in-process identification of material characteristics 103
K. Anokye-Siribor and U.P. Singh

In-process tool wear estimation in milling using cutting force model 113
S.K. Choudhury and S. Rath

Investigation of orthogonal turn-milling for the machining of rotationally symmetrical work pieces 120
S.K. Choudhury and K.S. Mangrulkar

An investigation of residual form error compensation in the ultra-precision machining of aspheric surfaces. 129
W.B. Lee, C.F. Cheung, W.M. Chiu and T.P. Leung

Material damage and forming limits of textured sheet metals. 135
C.Y. Tang and W.H. Tai

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.

CONTENTS direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. You can register for **ContentsDirect** online at: **www.elsevier.nl/locate/contentsdirect**

Elsevier Science S.A.

Physical modeling of blade forging 141
L. Yuli, D. Kun, Z. Mei, Y. He and Z. Fuwei

A novel forming technology for tailor-welded blanks 145
B. Kinsey, Z. Liu and J. Cao

Hot rolling of an aluminum–copper sandwich flat strip with the three-dimensional finite element method 154
Z.C. Lin and T.G. Huang

An upper bound analysis of a process-induced side-surface defect in forgings. Part 1: The velocity fields and power terms . . 169
Y.H. Moon, C.J. Van Tyne and W.A. Gordon

An upper bound analysis of a process-induced side-surface defect in forgings. Part 2: Characteristics and criteria curves 179
Y.H. Moon, C.J. Van Tyne and W.A. Gordon

Validation via FEM and plasticine modeling of upper bound criteria of a process-induced side-surface defect in forgings 185
Y.H. Moon and C.J. Van Tyne

Instable modes of in-plane bending of strip metal under unequal compressing 197
H. Yang, X. Feijun and X. Hongsheng

A study on the precision modeling of the bars produced in two cross-roll straightening 202
B.J. Wu, L.C. Chan, T.C. Lee and L.W. Ao

Prediction of laser butt joint welding parameters using back propagation and learning vector quantization networks 207
J.Y. Jeng, T.F. Mau and S.M. Leu

Three-dimensional finite element simulation of a spider hot forging process using a new remeshing scheme 219
J.R. Cho and D.Y. Yang

Study on the various coated twist drills for drilling stainless steels 226
W.C. Chen and X.D. Liu

Some considerations on the mitigation of fretting damage by the application of surface-modification technologies 231
Y. Fu, J. Wei and A.W. Batchelor

A novel method for predicting the grain size of superalloy forgings based on the fuzzy method and the FEM 246
Z.J. Luo, Q. Yang and D. Liu

Drill fracture detection by the discrete wavelet transform 250
B.Y. Lee and Y.S. Tarng

The generation of dislocations from twin boundaries and its effect upon the flow stresses in FCC metals 255
K. Konopka, J. Mizera and J.W. Wyrzykowski

TIG welding with single-component fluxes 260
P.J. Modenesi, E.R. Apolinário and I.M. Pereira

Evaluation of wear mechanisms of coated carbide tools when face milling titanium alloy 266
A. Jawaid, S. Sharif and S. Koksal

Short communication

A note on a proposed general criterion for brittle and ductile fracture in materials and structures 275
H.K. Oh

Letter to the Editor 277
Book review 278
Author Index 281
Subject Index 283
